

## 3 Tips to Curious Kids

### 1. Ask questions 1st... (even when you know the answer)

*Hatch Kiddo: "How are candles made?"*

*Hatch Parent: "I wonder! How do you think they are made?"*

### 2. Create open spaces for 'WONDER' daily... (even if all the other kids have activities piled on to their daily schedules)

*Hatch Kiddo: "What are we doing after school today?"*

*Hatch Parent: "We are going to visit our backyard and see what magical changes nature brought to our trees and flowers."*

### 3. Embrace making mistakes & let them figure it out... (even if you can do it faster & better)

*Hatch Kiddo is trying to put a screw driver into a screw and it is taking forever...*

*Hatch Parent (applies all the patience they possibly can and avoids giving any tips or help): "Wow, I love your persistence. You are not giving up."*

*Hatch Kiddo figures out his/her own creative way to make it work that the Parent may have never thought of.*
